Dear Sir/Madam,

Sub: Establishing SWAYAM NPTEL Local Chapter in your college

Greetings from the NPTEL office.

This is to acknowledge the receipt of your letter accepting to host SWAYAM NPTEL Local Chapter in your institution.

The **Single Point of Contact (SPOC)** nominated from your college is

Name of SPOC: SAGAR MUKUNDRAO GAWANDE
Designation: ASSISTANT PROFESSOR
Department: CIVIL ENGINEERING
Contact No(s): 9922169404
E-mail id: gawande.sagar@gmail.com

We wish to inform you that all future correspondence related to NPTEL contents and online courses will be made to the afore-mentioned SPOC. He/she will be routinely updated with all the latest NPTEL initiatives which then may be circulated among the students.

We are also happy to share that a dedicated SWAYAM NPTEL Local Chapter web page is being created and your institution will have a separate page on it (<http://archive.nptel.ac.in/LocalChapter>)

Thanking you.

Sincerely

Prof. Andrew Thangaraj

Blockchain:

The Blockchain distributed ledger technology has attracted significant attention, with a plethora of platforms such as Ethereum, Ripple, Sawtooth Lake, Hyperledger Fabric, Stellar, Corda, Hashgraph etc. gaining wide adoption. The key novelty of Blockchain (and other distributed ledger technologies) is its ability to enable sharing of a common ledger amongst trustless (and anonymous in some cases) parties using distributed consensus protocols and cryptographic puzzles, and its support of a programmable smart contracts framework, allowing (trustless) users to script the appropriate updates to the underlying ledger depending on inputs, in a Byzantine fault tolerant manner. These very properties are most successfully leveraged by crypto currency platforms such as Bitcoin, Ethereum, Ripple etc. which use blockchain as their underlying ledger to maintain consensus on the ownership of their currencies.

Apart from being the underlying ledger for crypto currencies, Blockchain is also emerging as the platform of choice for creating innovative smart-contracts based distributed applications amongst trustless participants. The widely successful series of initial coin offerings (ICO) on Ethereum platform are a very good example of the same.

The evident success of Blockchain technology as an enabler of crypto-currencies and the its even bigger potential (and attendant challenges of crime prevention) as the medium of bringing transparency and efficiency to a large body of present day problems has already prompted significant scrutiny from academic, multiple industries and governments of its applicability on the aspects of identifying newer use cases, ways to enhance its performance as well as alternative designs and implementations of blockchain.
