7.1.1 Institution has initiated the Gender Audit and measures for the promotion of gender equity during the last five years.

As a conscious society we all know that gender equity promotes balanced development and sustainable society. Gender equality has been conclusively shown to stimulate economic growth, which is crucial for developing countries. Gender sensitization presides over gender sensitivity, the modification of behavior by raising awareness of gender equality concerns. The concept of gender equity refers to "fairness of treatment for both women and men, according to their respective needs. Gender equity is the process of being fair to women and men. To ensure fairness, strategies and measures must often be available to compensate for women's historical and social disadvantages that prevent women and men from otherwise operating on a level playing field. Equity leads to equality. Equity is the fundamental principle of our constitution. Being an academic institute we appreciate, encourage and implement such equity in our day to day practices. Our institution is preferentially known for such equal opportunities to all in various manners. Gender equality is our specially focused area by practice. Our institution has adopted several policies and designed some activities to encourage Gender Equity in our institute. In our institute Gender Equity is shown through organizing various programs including male-female students as well as teachers.
